Laravel: Validation

Laravel: Validation

Required steps before validation:

- Route in **routes/web.php**
- Created controller in **app/Http/Controllers**

```
Route::group(['prefix' => 'admin', 'middleware' =>
['web', 'auth'], 'namespace' => 'Admin'], function () {

    Route::resource('subjects', 'SubjectsController');
    Route::resource('tutors', 'TutorsController');
});
```

Laravel: Validation in action

```
$rules = array(
    'title'      => 'required|min:8',
);
$validator = Validator::make($request->all(), $rules);

// process the login
if ($validator->fails()) {
    return redirect('admin/subjects/create')
        ->withErrors($validator)
        ->withInput($request->all());
} else {
    // save data to DB
    return redirect('admin/subjects');
}
```

Laravel: Validation in action

```
$rules = array(
    'title'      => 'required|min:8',
);
$validator = Validator::make($request->all(), $rules);

// process the login
if ($validator->fails()) {
    // return to form
} else {
    // save data to DB
    return redirect('admin/subjects');
}
```

Laravel: Validation in action

```
$rules = array(
    'title' => 'required|min:8',
);
$validator = Validator::make($request->all(), $rules);

// process the login
if ($validator->fails()) {
    return redirect('admin/subjects/create')
        ->withErrors($validator)
        ->withInput($request->all());
} else {
    $subject = new Subjects([
        'title' => $request->get('title')
    ]);

    $subject->save();
    return redirect('admin/subjects');
}
```

Laravel: Validation in action

<https://laravel.com/docs/5.5/validation#available-validation-rules>

Laravel: Validation in Request

```
public function update(UpdateTutor $request, $id)
{
    $tutor = Tutors::find($id);
    $tutor->title = $request->get('title');
    $tutor->save();
    return redirect('/admin/tutors')->with('success',
'Task was successful!');
}
```
